

SAVING YOUR BASKET

Use this function to save your chosen products to be retrieved at a later date. We have added this feature to give you time to return and fine tune your proposed purchases without having to go through the selection process again.

You will either need to log in to your User area or Register to obtain access to a User area.

LOG IN

The screenshot shows a website's 'User registration' page. On the left is a navigation menu with categories like 'BEDSIDE TABLES', 'CORNER STORAGE', 'DINING TABLES', and 'DRESSERS'. The main content area has a promotional banner at the top, followed by the heading 'USER REGISTRATION'. Below this, there is a link that says 'If you have already registered with us, please log in here.' An arrow from a 'LOG IN' callout box points to this link. Below the link is a registration form with fields for 'First Name*', 'Surname*', 'Email Address*', and 'Confirm Email Address*'. A note above the form says 'Please complete the enquiry form below to register with us (required fields marked with *). The given email address and password will serve as your login credentials.'

Click on the sentence: If you have already registered with us, please log in here.

Enter the email address and password you submitted when registering, and click Login (you will notice that the Login link on the far right of the top menu bar will change to User area).

The next page will show either products you have previously saved or nothing at all.

SAVED PRODUCT DATA

Click Add in the right hand box of the saved product description to send it back to the Basket Page.

NOTE: If the product is already on the basket page this will double the quantity, so check this is correct.

Once all your saved products are back on the Basket page you can add (Continue shopping) or delete (click the dustbin symbol next to quantity) as necessary.

If you're still mulling things over, you can save products from the Basket page to your user area at any time to return at a later date. Don't forget to log off at the end of your session.

REGISTER

This screenshot is identical to the one above, showing the 'User registration' page. However, an arrow from a 'REGISTER' callout box points to the registration form fields instead of the login link.

You will need to register in order to save products for later or make a purchase online so, if you haven't yet registered, complete the form and click Register.

You will shortly receive an email confirming your registration.

Click on the link in the email to activate and you can then proceed as above to save your chosen products for later, or make a purchase.
